Allergan, plc, a multinational pharmaceutical company, maintains a production and packaging facility in the City of Cincinnati that employs nearly 200 individuals and contributes significantly to local and Ohio economies through its operating and capital expenditures. Allergan also contributes to charitable organizations throughout Ohio and, in particular, Cincinnati through financial contributions by the Allergan Foundation and volunteer efforts of Allergan associates.

**TOTAL ECONOMIC IMPACT**

In 2017, Allergan contributed more to Ohio’s economy than just the direct employment supported by operations and capital expenditures. Portions of Allergan’s direct wages and expenditures fueled Ohio’s economy as they were spent on goods and services sourced from other businesses in the state. The sum of Allergan’s direct jobs and expenditures in Ohio and the indirect jobs and expenditures supported by the money which flowed through Ohio’s economy constituted Allergan’s total statewide economic impacts for 2017.
