

ZORAC[®] cream

(tazarotene 0.5 mg/g and 1.0 mg/g)

Consumer Medicine Information

What is in this leaflet

This leaflet answers some common questions about ZORAC[®] cream. It does not contain all the available information. It does not take the place of talking to your doctor or pharmacist.

All medicines have risks and benefits. Your doctor has weighed the risks of you taking ZORAC[®] cream against the benefits they expect it will have for you.

If you have any concerns about using this medicine, ask your doctor or pharmacist.

Keep this leaflet with the medicine.

You may need to read it again.

What ZORAC[®] cream is used for

ZORAC[®] 0.5 mg/g and 1.0 mg/g (0.05% w/w and 0.1% w/w) cream is used to treat plaque psoriasis. In addition, 1.0 mg/g is used to treat facial acne.

Acne is characterised by inflamed pimples and non-inflamed pimples on the skin.

Psoriasis is characterised by inflamed red skin with red, thickened areas often with silvery scales called plaques.

ZORAC[®] cream contains tazarotene as the active ingredient which is a retinoid. The exact mechanisms of action for psoriasis and acne are not known. It is thought to act by helping skin cells to grow normally as well as having an anti-inflammatory effect in psoriasis and acne.

ZORAC[®] cream is only available with a doctor's prescription from pharmacies. Your doctor may have

prescribed ZORAC[®] cream for another reason.

Ask your doctor if you have any questions about why ZORAC[®] cream has been prescribed for you.

Before you use ZORAC[®] cream

When you must not use it

Do not use ZORAC[®] cream if:

- you have an allergy to tazarotene or any of the ingredients listed at the end of this leaflet.
- you are pregnant or plan to become pregnant.
- you have a skin condition called eczema. ZORAC[®] cream may cause severe irritation if used on eczematous skin.
- the tube/packaging shows signs of tampering.
- the product does not look quite right.
- the expiry date on the tube has passed.

If you use this medicine after the expiry date has passed, it may not work effectively.

It is not known whether ZORAC[®] cream is safe and useful for children and adolescents under 18 years, in psoriasis or under 12 years in acne.

This cream is for topical use only. Avoid contact with eyes, eyelids and mouth.

Before you start to use it Tell your doctor if

- you have had an allergy to any medicines or any other substances, such as foods, preservatives or dyes.

- if you are pregnant or intend to become pregnant.

Like many medicines, ZORAC[®] cream should not be used during pregnancy. Talk to your doctor about effective birth control if you are a woman who is able to become pregnant.

Talk to your doctor about a time period after which pregnancy can be contemplated after using ZORAC[®] cream.

If you become pregnant while using this medicine, stop using it and contact your doctor immediately as this product may cause birth defects.

- you are breast feeding or intend to breast feed.
- you have sunburn. You should wait until your skin has finally recovered from the sunburn before using ZORAC[®] cream.

Taking other medicines

Tell your doctor or pharmacist if you are taking any other medicines, including any that you buy without a prescription from your pharmacy, supermarket or health food shop.

Tell your doctor or pharmacist if you are taking medicines that are known to cause sun sensitivity e.g. thiazides, tetracyclines, fluoroquinolones, phenothiazines and sulfonamides.

If you take these medicines while using ZORAC[®] cream, your skin may become more sensitive to the sun.

Watch your reaction to ZORAC[®] cream carefully if you are also using other skin products with a strong drying effect or high amounts of alcohol, astringents, spices, lime peel, medicated soaps or shampoos, permanent wave solution, electrolysis, hair depilatories or

waxes or other products or processes that may dry or irritate the skin.

Ask your doctor or pharmacist if you have any concerns about using ZORAC[®] cream as well as other medications.

How to use ZORAC[®] cream

How much to use

Your doctor will tell you how much cream you need to use each day.

Use ZORAC[®] cream only as prescribed by your doctor.

For psoriasis: apply ZORAC[®] cream once a day, in the evening, to the psoriatic lesions using enough to cover only the lesions with a thin film.

For acne: apply a thin film of ZORAC[®] 1.0 mg/g cream once a day in the evening to the skin where acne lesions appear.

Follow all directions given to you by your doctor carefully.

The directions may differ from the information contained in this leaflet.

Use ZORAC[®] cream every day, at about the same time each day, unless your doctor tells you otherwise.

How to use it

Psoriasis:

Remove makeup (if present) before applying ZORAC[®] cream. If you wash your face prior to application, you should allow your skin to dry before applying ZORAC[®] cream.

After the skin is dry, apply a thin layer of ZORAC[®] cream once a day to the areas of your skin with psoriasis.

Carefully avoid application of the cream to other areas that are not affected by psoriasis. If the cream is applied to areas that are not required to be treated wash the cream off.

Follow your doctor or pharmacists' directions for other routine skin care and the use of make-up.

Wash your hands after applying medication unless you are treating your hands for psoriasis. If you are treating hands, avoid contact with the eyes.

Do not use more ZORAC[®] cream than instructed or more often than instructed.

While using ZORAC[®] cream, weather extremes, such as wind or cold may irritate your skin more than usual. Application of the cream may cause burning or stinging for a short time. If this persists, talk to your doctor or pharmacist. You should avoid using a solarium and when outside you should use a sunscreen with an SPF of at least 15 and protective clothing during the day.

Ask your doctor or pharmacist any questions you may have.

How to use it

Acne:

Remove makeup (if present) before applying ZORAC[®] cream. If you wash your face prior to application, you should allow your skin to dry before applying ZORAC[®] cream.

After the skin is dry, apply a thin layer of ZORAC[®] cream once a day to the skin where the acne lesions appear.

Use enough to cover the entire affected area. All skin prone to acne should be treated.

Carefully avoid application of the cream to other areas that are not affected by acne. If the cream is applied to areas that are not required to be treated, wash the cream off.

Follow your doctor or pharmacists' directions for other routine skin care and the use of make-up. You should talk to your doctor or pharmacist about the use of sunscreens, moisturisers and cosmetics.

If emollients or a moisturiser are used, they can be applied before or after ZORAC[®] cream but whichever one is applied first should be allowed to absorb into the skin before the next one is applied.

Wash your hands after applying medication. If the cream is applied to areas that are not required to be treated, wash the cream off.

Keep ZORAC[®] cream away from your eyes and mouth. If the cream gets in your eyes, wash them with large amounts of cool water. Contact your doctor if eye irritation continues.

While using ZORAC[®] cream, weather extremes, such as wind or cold, may irritate your skin more than usual.

Application of the cream may cause burning or stinging for a short time. If this persists, talk to your doctor or pharmacist. You should avoid using a solarium and when outside you should use a sunscreen with an SPF of at least 15 and protective clothing during the day.

Ask your doctor or pharmacist any questions you may have.

How long to use it

Continue using ZORAC[®] cream for as long as your doctor prescribes.

If you forget to use it

If you miss a dose, do not try to make it up. Continue your normal schedule.

Do not use double the amount to make up for the dose that you missed.

If you use too much (overdose)

If you accidentally put ZORAC[®] cream in your eye(s), immediately rinse your eye(s) with large amounts of cool water. Contact your doctor if eye irritation continues.

If you think that you or anyone else may have swallowed ZORAC[®] cream, immediately telephone your doctor or **Poisons Information Centre (Australia: telephone 13 11 26; New Zealand: telephone 0800 POISON or 0800 764 766)** for advice or go to casualty at your nearest hospital. Do this even if

there are no signs of discomfort or poisoning.

While you are using ZORAC[®] cream

Things you must do

You should use adequate contraception (e.g. the pill, condoms) while using ZORAC[®] cream.

If you become pregnant while using ZORAC[®] cream, stop use and tell your doctor immediately.

Tell your doctor if your condition gets worse or does not get better while using ZORAC[®] cream.

If you are about to start any new medicine, tell your doctor or pharmacist that you are using ZORAC[®] cream.

Things you must not do

Do not give ZORAC[®] cream to anyone else, even if they have the same condition as you.

Side effects

All medicines can have side effects. Sometimes they are serious, most of the time they are not. You may need medical treatment if you get some of the side effects.

Tell your doctor or pharmacist as soon as possible if you do not feel well while you are using ZORAC[®] cream.

Check with your doctor or pharmacist as soon as possible if you have any problems while using ZORAC[®] cream, even if you do not think the problems are connected with the medicine or are not listed in this leaflet.

Ask your doctor or pharmacist to answer any questions you may have.

After using ZORAC[®] cream

Storage

Keep your ZORAC[®] cream in a cool place where the temperature stays below 25°C.

Do not put it in the refrigerator or freezer.

Keep the tube where children cannot reach it.

Do not leave the top/lid off the tube for any length of time to avoid contaminating the cream.

Disposal

Throw out any remaining cream after 12 months from the date of opening.

If your doctor tells you to stop using the cream or it has passed the expiry date, ask your pharmacist what to do with any remaining cream.

Product description

What ZORAC[®] cream looks like

A white to off white cream in collapsible aluminium tube with

tamper-evident opening and screw cap.

Ingredients

Active ingredient:

Tazarotene 1.0 mg/g (0.1% w/w) or
Tazarotene 0.5 mg/g (0.05% w/w)

Preservative:

Benzyl alcohol

Inactive ingredients:

Sodium thiosulfate pentahydrate
Disodium edetate
Liquid paraffin
Medium chain triglycerides
Carbomer 1342
Sorbitan mono-oleate
Carbomer 934P
Sodium hydroxide
Purified water
